

Practice Exercise 5: Operators

Open Practice 7 workbook

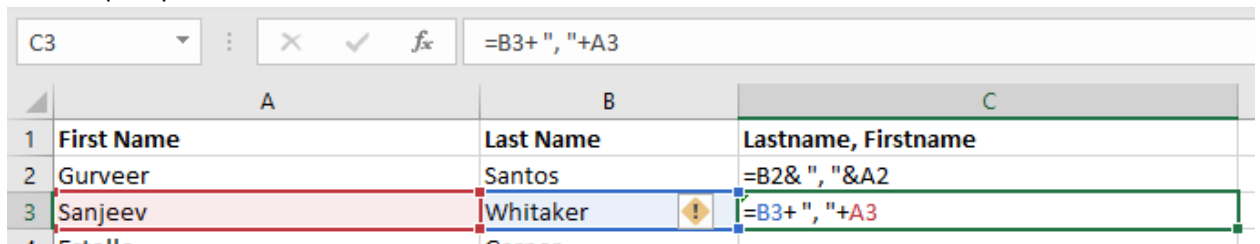

Instructions: Concatenate Operator

1. In column C, use the concatenate operator (&) to create a format <Lastname>, <Firstname>

	A	B	C
1	First Name	Last Name	Lastname, Firstname
2	Gurveer	Santos	=B2& ", "&A2
3	Sanjeev	Whitaker	

2. Use the pls operator to do the same for column 3

	A	B	C
1	First Name	Last Name	Lastname, Firstname
2	Gurveer	Santos	=B2& ", "&A2
3	Sanjeev	Whitaker	=B3+ ", "+A3
4	Sanjeev	Whitaker	

3. See the result. The first one was able to concatenate the names. The second one returns an error since we cannot use arithmetic operators for text values.

Instructions: Order Precedence
